FOXESS home battery packages

A FOXESS hybrid inverter with a stack of CQ7 battery modules, supplied and installed by NRGPAL as one package.

Suits: Households that want a full night of stored energy, on single or three-phase supply, with the option to keep an existing solar system.

What you get

INVERTER
Single phase: H1-G2 5 kW, or KH 8 or 9.9 kW. Three phase: H3 5, 9.9 or 15 kW.

BATTERY
CQ7 modules of 6.96 kWh each, all usable: 27.84 kWh (4 modules) or 41.76 kWh (6 modules). Lithium iron phosphate.

SOLAR
Room for 10 to 30 kW of panels, depending on the inverter

BACKUP
Backup (EPS) output keeps chosen circuits running in an outage. Which circuits is decided at the site assessment.

EXISTING SOLAR
Works as a new install or added to the solar you have (AC-coupled)

BUILT FOR OUTSIDE
IP65 inverter and battery

MONITORING
FoxCloud app and web portal

WARRANTY
10 years on the inverter and the battery (battery to 70% of its energy or a set throughput, whichever comes first)

The packages (11 on our website)

Each links to its page, with the full specifications and indicative price.

- 5kW / 27.84kWh — 1 Phase
- 5kW / 41.76kWh — 1 Phase
- 8kW / 27.84kWh — 1 Phase
- 8kW / 41.76kWh — 1 Phase
- 9.9kW / 27.84kWh — 1 Phase
- 9.9kW / 41.76kWh — 1 Phase
- 5kW / 27.84kWh — 3 Phase
- 9.9kW / 27.84kWh — 3 Phase
- 9.9kW / 41.76kWh — 3 Phase
- 15kW / 27.84kWh — 3 Phase
- 15kW / 41.76kWh — 3 Phase

Before you choose on size. Federal battery certificates are tiered: weighted toward the first 14 kWh of usable capacity, tapering from 14 to 28 kWh, and small above that. A bigger battery does not earn a proportionally bigger discount. We size from your evening and overnight use and the backup you want, not the rebate. The install date decides which rules apply.

Your next step: a 4-minute assessment

Answer a few questions and send a few photos in your own time. We use them to plan an accurate quote without a wasted trip.
