GoodWe ESA home battery packages

The GoodWe ESA all-in-one: the hybrid inverter sits on top of its battery modules, with backup switching built in. Supplied and installed by NRGPAL as one package.

Suits: Households that want whole-home backup in one neat unit, with room for a large solar array across several roof faces.

What you get

INVERTER
GoodWe ESA hybrid: 9.99 kW single or three phase, or 15 kW three phase

BATTERY
Modules of 8.0 kWh usable each: 16, 24, 32, 40 or 48 kWh. Lithium iron phosphate.

SOLAR
Up to 20 kW of panels (9.99 kW models) or 30 kW (15 kW models), across 4 MPPT inputs

BACKUP
Whole-home capable through a 63 A bypass; switchover under 4 ms

ONE TIDY UNIT
Inverter, meter and backup switching in one stack, about 800 mm wide

SAFETY
IP66 inverter and modules; each module has a built-in fire-extinguishing unit

MONITORING
SEMS+ app over Wi-Fi, LAN or Bluetooth

WARRANTY
10 years on the inverter and the battery modules (battery to 70% of its usable energy or a set throughput, whichever comes first)

The packages (12 on our website)

Each links to its page, with the full specifications and indicative price.

- 9.99kW / 16kWh — 1 Phase
- 9.99kW / 24kWh — 1 Phase
- 9.99kW / 32kWh — 1 Phase
- 9.99kW / 40kWh — 1 Phase
- 9.99kW / 48kWh — 1 Phase
- 9.99kW / 24kWh — 3 Phase
- 9.99kW / 32kWh — 3 Phase
- 9.99kW / 40kWh — 3 Phase
- 9.99kW / 48kWh — 3 Phase
- 15kW / 32kWh — 3 Phase
- 15kW / 40kWh — 3 Phase
- 15kW / 48kWh — 3 Phase

Before you choose on size. Federal battery certificates are tiered: weighted toward the first 14 kWh of usable capacity, tapering from 14 to 28 kWh, and small above that. A bigger battery does not earn a proportionally bigger discount. We size from your evening and overnight use and the backup you want, not the rebate. The install date decides which rules apply.

Your next step: a 4-minute assessment

Answer a few questions and send a few photos in your own time. We use them to plan an accurate quote without a wasted trip.
